FROM: Sunshine Valley Utilities Ltd.**

SUBJECT: AFTERNOON UPDATE – Water Trucks Augmenting Supply Beginning Sept 24

Dear Trites Creek Water Users,

Once again, the SVUL team is working diligently to restore full water services.

As with the initial installation of the well system, it is taking time to ramp up supply in order to exceed demand. To help bridge that gap, **arrangements have been made to augment our supply by truck.**

This should top everything up so that our current supply can support use.

Trucking schedule

Trucking will begin **tomorrow morning, September 24, at 08:00 hours.**

Please **look out for the truck** as it moves between the fill site and the tank farm at the top of Parkhill. Please drive with caution in that area and keep children and pets clear of the roadway while the truck is in motion.

Our thanks

We again apologize for the inconvenience caused by this situation, and we thank the community for stepping up — as usual — to help each other. Your patience and neighbourly support continue to make a real difference.

We will provide further updates as needed.

Respectfully,

David Bull

David Bull, President
Sunshine Valley Utilities Ltd.
