

Geo-Hazard report for the OCP underway

- Overview geo-hazard report – completed for OCP update flagged landslide area @ Mt Cheam – NEEDED MORE (2nd) STUDY
- FVRD worked with partners (ie. Kinder Morgan) to fund 2nd study – costly and complex scientific work – was not successful
- 2nd study underway with consultant (BGC Engineering Ltd), world leaders in landslide risk. Requires technical and scientific study – ie. field visits on mountain slopes, computer modelling and scientific design/review.
- FVRD is working hard to keep costs down and ensure study area is the least amount possible.
- Study is complex scientific work – undertaken by BGC for public sector (cheaper rate) vs. quicker study times = high cost, usually for big companies (ie. Kinder Morgan)
- Study expected to be complete this Fall 2017.
